

## Word Wall

A word wall is an important part of a balanced literacy program in any early childhood classroom. Word walls can be used to display an organized collection of names, theme words, or sight words in a highly visible place in the classroom. Word walls are used differently depending on the ages of the children being taught. We learn two new words a week from our high frequency word list! In order to learn and master these words we do activities like, sand writing, play-doh word building, and using pipe cleaners to build the words. !
